

Sverige vänner,

Many thanks for inviting me on your congress. On behalf of the youth organisation of the Vlaams Belang (Flemish Interest), I would like to bring you a message from Flanders.

Above all, this is a message of cooperation. Especially within Europe, we must unite our forces to counter the current undemocratic, unworldly and extremely expensive EU.

I would hereby like to cite some numbers that have been calculated by our European Members of Parliament. These statistics are from the year 2008 and are the most recent numbers available. In the European Union, with its 27 member states, there were 12 so called "net payers" in 2008. Net payers are countries that pay more than what they receive.

Of course, in absolute numbers, big countries as Germany and France are the biggest net payers. However, if you divide the net cost by the number of inhabitants of each country, Flanders is on top of the list.

As of all of the EU, Flemish citizens pay the most. Each Fleming pays 286 euro per year, which comes down roughly to 1,150 euro for an average family.

With 273 euro, The Netherlands occupy the second place. And yes, with 194 euro or almost 1,800 Swedish Crones, Sweden completes the top 3 of biggest net payers. Congratulations! You pay more than a German, more than twice as much as an Italian, three times the amount a Frenchman pays and four times as much as a Briton.

For decades, Great Britain enjoys a politically negotiated discount. Inspired by this British example, Sweden, The Netherlands and Germany have obtained a discount as well. Still, Sweden and The Netherlands are in the top 3 of the biggest net payers per capita. The fact that Flanders occupies the first place, is a consequence of the scandalous way Belgium defends the Flemish interests on a European level. Flanders needs to stand up in Europe as an independent state. We want nothing less than Flemish independence.

Chaps!

Flanders no longer can afford such an enormous money flow towards the EU. The biggest problem is that the EU does not use this money in an efficient way. The way these billions are spent is not sufficiently monitored. Neither is there an objective calculation of efficiency and results. The fact that the European Audit Office is refusing for years to approve the European expenses, proves that there definitely is something absolutely and really wrong.

Apart from its economic tasks, the EU must also clamp down on mass immigration. Currently, the EU seems to be suffering from politically correct madness and is assuming that the following years, millions of immigrant workers have to be welcomed into the EU. In reality, mass immigration creates nothing but social problems. We are importing unemployment and are endangering our social services. Europe needs to take action now! Its borders need to be closed and guarded and the separate member states need to be able to conduct a firm policy on asylum and immigration.

A few months ago our party organized a big congress in Antwerp where we proved that a firm immigration policy is the only effective solution. Several European parties gave their point of view on immigration, such as the Lega Nord, the FPÖ and Kent Ekeroth of the Swedish Democrats.

Did you know that

- In Italy, slum landlords whom give shelter to illegal immigrants, their houses are always confiscated?
- In The Netherlands, illegal immigrants have to pay their medical costs themselves?
- In The Netherlands, Denmark and Austria, double nationality is prohibited?
- In Switzerland, immigrants can obtain Swiss nationality only after a period of 12 years and only if they successfully passed a citizenship test?
- In Austria, rejected asylum seekers are immediately deported?
- Denmark organizes family reunification in the country of origin?
- In Switzerland, immigrants lose their residence permit and even get deported if they're convicted of criminal facts such as drug dealing, burglary or social fraud?
- Ritual slaughter of animals is prohibited in countries as Austria, Switzerland, Denmark, Finland, Norway, Estonia and Iceland?
- In Switzerland, there is a minaret ban?

All these examples are showing that a great number of countries are clamping down on immigration. Alas, the situation in Belgium is absolutely hopeless. It's a disaster. It is shocking!

I don't know if you have a thorough knowledge of Belgium. It is an artificial, dysfunctional country. We are led by a royal family whom even does not speak Dutch which is the language of the majority of the population. However these money burden family is desperately trying and striving to hold the country together. Today, it has been 454 days since our federal elections. A federal government still hasn't been formed, because Flemings and Walloons can't find an agreement. 454 days, a world record. Even in Iraq they formed faster a government. I'm not unhappy with the current developments, because every Belgian government is inspired by francophone, leftwing interests.

Many years of leftwing policies have turned our world upside down. Whoever drives to fast, loses his driver's license. But illegal immigrants who can hide long enough, are rewarded with a residence permit. If you're too late to make your tax declaration, you receive a heavy fine. But asylum seekers who lie and cheat, can without a problem submit a new asylum request. If you are self employed and you haven't completed all the necessary forms, you are treated as a criminal, while immigrants who have worked one single day are already entitled to an unemployment benefit. If you light a cigarette in a pub, you're almost dragged to jail. However, Muslim extremists are allowed by law to incite hatred, murder and violence.

The soft leftwing policy has created a giant influx of immigrants that is still increasing year after year. In 20 years time, more than 1,700,000 immigrants have entered our country, half of which from outside the EU. These are crazy statistics for a small country with less than 11 million inhabitants. With 459 inhabitants per square kilometer, Flanders has the highest population density of Europe. If we want to give our children and grandchildren a decent future, we must stop immigration now!

My friends,

Instead of yet another leftwing federal government, we need an independent Flemish council. A Flemish council that is proud of our civilization. Because now, instead of showing pride in being

Flemish and European, multiculturalism is being promoted. Multiculturalism has not only broken our identity and our cultural self-confidence, but has also cleared the path for Islam.

The quick growth of Muslims in Europe is frightening and the British newspaper The Telegraph has even qualified this phenomenon as a demographic time bomb. The most popular baby name in Brussels is Mohammed. Need I say more? Mass immigration needs to be stopped and all immigrants that reside in our country need to adjust to our values (equality of man and woman, freedom of speech and the separation of church and state, just to name a few). In our country, the opposite is happening: the Islamic ceremonial offering is sponsored with tax money, in some swimming pools, men and women are separated, lots of schools serve halal food and mosques pop up like mushrooms. Certain toy shops now even sell play farms without plastic pigs, just to not offend Muslims. Can you imagine! Vlaams Belang wants immigrants to adjust to us, to our culture and our values, not the other way around.

The Vlaams Belang Youth has always defended our Flemish identity. We are proud of our Flemish culture. Being true democrats, we fight against Islam. Today, I want to plead for an assertive and defensible democracy that protects our way of life and is not trampled over by Islam. Let me permit to say that this attitude is also needed in Sweden. This week it came to my attention that the police of Malmö has to follow a course regarding the Arabic language and a course regarding conduct towards socializing with muslims. This is supposed to be a politically correct way to handle the Arab criminals at Rosengard. It is clear we have to join forces. Indeed, in the battle against Islam, we must fully support each other.

Meanwhile, the German Prime Minister Angela Merkel, the British Prime Minister David Cameron, the French President Sarkozy and the Dutch Minister-President Mark Rutte have seen the light. These are the people who gave way to mass immigration and multiculturalism, and now openly admit the failure of multicultural society.

Even in Belgium, more and more people have come to this conclusion. We have recently obtained a symbolic victory. Since a number of months, a burka ban has been installed in our country, thanks to a law proposal of Vlaams Belang.

Dear friends,

Vlaams Belang is not a party of liberals, but we want a prosperous economic climate for Flanders, Sweden and Europe. We want the West to become a place where thoughts and opinions are really free.

Vlaams Belang is not a party of socialists, but we want Flanders, Sweden and Europe to support and help its inhabitants. No one can be left to fend for himself.

Vlaams Belang is not a party of Christian democrats, but we want Flanders, Sweden and Europe to become places where values, rules and families are respected.

It is time to send out a signal of hope to our people. Hope of a Flemish Flanders, a Swedish Sweden and a European Europe. Together with the Swedish Democrats, the FPÖ, La Destra, The Danish People's Party, the Ring Freiheitlicher Jugend and a great number of other rightwing patriotic parties, Vlaams Belang stands proud!

Thank you very much
